Name: Jie Mei   Student ID: 300364433

I am confirming that I have completed this lab completely
based on the requirements and it is working and fully
functional.

Screenshots:

```java
public static void main(String[] args) {
    // define three variables to store the number of different numbers input
    int pos_num = 0;
    int neg_num = 0;
    int zero_num = 0;

    Scanner sc = new Scanner(System.in);

    // use for loop to input five times
    for(int i = 1 ; i <= 5; i++ )
    {
        System.out.print("Please input a number("+ i +"/5): ");
        double temp = sc.nextDouble();

        // judge the numbers' type after every input
        if(temp > 0)
        {
            pos_num++;
        }
        else if(temp < 0)
        {
            neg_num++;
        }
        else
        {
            zero_num++;
        }
    }
```

```
Please input a number(1/5): 1
Please input a number(2/5): 2.1
Please input a number(3/5): -3
Please input a number(4/5): 0
Please input a number(5/5): 0
You have 2 positive number(s), 1 negative number(s) and 2 zero(s).
```

```
Please input a number(1/5): 0
Please input a number(2/5): 0.3
Please input a number(3/5): -3.5
Please input a number(4/5): 2
Please input a number(5/5): -3
You have 2 positive number(s), 2 negative number(s) and 1 zero(s).
```
